## Representative Engagements

- Represented electronics design (printed circuit boards) software company in patent infringement dispute regarding license management rights components of its software. Obtained favorable settlement for defendant prior to *Markman* hearing.
- Represented legacy chip maker in dispute against U.S. Postal Service and vendor related to software rights. Obtained favorable settlement.
- Represented design product client against trade dress infringement claim and obtained favorable licensing rights for client.
- Represent fine art company on a continuing basis advising on copyright and trade dress issues.
- Represented numerous companies in trade secret cases and obtained several injunctions after contested, evidentiary hearings.
- Obtained numerous favorable settlements in patent cases involving computer peripherals; security software; group messaging; computer bandwidth technology; Bluetooth technology; account management technology; and deception software and hardware technology, among others.
- Represented several clients in partnership dissolution and other related intellectual property and contract disputes involving medical billing software, information management software, real estate management, background verification software and access control hardware and software for private and military installations, among others.
- Serve as outside general counsel to specialized insurance company providing business and litigation advice and representation.
- Represented clients against their former attorneys in legal malpractice cases including cases involving securitization of a note (week-long trial with \$1.2 million verdict against largest law firm in the world); securitization of lien paperwork/misconduct at trial (successful settlement); and failure to maintain patent rights (successful settlement), among others.
